CA04 Footnotes

<http://www.bea.gov/regional/reis/default.cfm?selTable=CA04>

Legend / Footnotes:

- 1/ Nonfarm personal income is total personal income less farm income.
 - 2/ Farm income is farm earnings less farm employer contributions for social insurance.
 - 3/ Census Bureau midyear population estimates. Estimates for 2010-2013 reflect county population estimates available as of March 2014.
 - 4/ Per capita personal income is total personal income divided by total midyear population.
 - 5/ Employer contributions for government social insurance are included in earnings by industry and earnings by place of work, but they are excluded from net earnings by place of residence and personal income. Employee and self-employed contributions are subtractions in the calculation of net earnings by place of residence and all of the income measures.
 - 6/ The adjustment for residence is the net inflow of the earnings of interarea commuters. For the United States, it consists of adjustments for border workers and US residents employed by international organizations and foreign embassies.
 - 7/ Rental income of persons includes the capital consumption adjustment.
 - 8/ Includes actual employer contributions and actuarially imputed employer contributions to reflect benefits accrued by defined benefit pension plan participants through service to employers in the current period.
 - 9/ Proprietors' income includes the inventory valuation adjustment and the capital consumption adjustment.
- Note-- All dollar estimates are in current dollars (not adjusted for inflation).
Last updated: November 20, 2014-- new estimates for 2013; revised estimates for 2001-2012.

CA04 Footnotes

<http://www.bea.gov/regional/reis/default.cfm?selTable=CA04>

Legend / Footnotes:

1/ Nonfarm personal income is total personal income less farm income.

2/ Farm income is farm earnings less farm employer contributions for social insurance.

3/ Census Bureau midyear population estimates. Estimates for 2010-2013 reflect county population estimates available as of March 2014.

4/ Per capita personal income is total personal income divided by total midyear population.

5/ Employer contributions for government social insurance are included in earnings by industry and earnings by place of work, but they are excluded from net earnings by place of residence and personal income. Employee and self-employed contributions are subtractions in the calculation of net earnings by place of residence and all of the income measures.

6/ The adjustment for residence is the net inflow of the earnings of interarea commuters. For the United States, it consists of adjustments for border workers and US residents employed by international organizations and foreign embassies.

7/ Rental income of persons includes the capital consumption adjustment.

8/ Includes actual employer contributions and actuarially imputed employer contributions to reflect benefits accrued by defined benefit pension plan participants through service to employers in the current period.

9/ Proprietors' income includes the inventory valuation adjustment and the capital consumption adjustment.

Note-- All dollar estimates are in current dollars (not adjusted for inflation).

Last updated: November 20, 2014-- new estimates for 2013; revised estimates for 2001-2012.

COUNTY NONFARM PERSONAL INCOME GROWTH QUOTIENT
I.C. 6-1.1-17-3.5
DATE PREPARED: JULY 10, 2015
COUNTY: CARROLL COUNTY

Step 1a: Determine calendar year county nonfarm
personal income for each of the six preceeding years

Step 1b: Calculate the annual percent change for
each of the six preceding years

Step 2: Sum the results of Step 1b
Step 3: Divide the results of Step 2 by six

SIX YEAR AVERAGE GROWTH

Year		Annual Carroll Nonfarm Personal Income	Percent From 2006	Change To 2007	Calculation
0	2007	623,048.0	2006	2007

CA04 Footnotes

<http://www.bea.gov/regional/reis/default.cfm?selTable=CA04>

Legend / Footnotes:

1/ Nonfarm personal income is total personal income less farm income.

2/ Farm income is farm earnings less farm employer contributions for social insurance.

3/ Census Bureau midyear population estimates. Estimates for 2010-2013 reflect county population estimates available as of March 2014.

4/ Per capita personal income is total personal income divided by total midyear population.

5/ Employer contributions for government social insurance are included in earnings by industry and earnings by place of work, but they are excluded from net earnings by place of residence and personal income. Employee and self-employed contributions are subtractions in the calculation of net earnings by place of residence and all of the income measures.

6/ The adjustment for residence is the net inflow of the earnings of interarea commuters. For the United States, it consists of adjustments for border workers and US residents employed by international organizations and foreign embassies.

7/ Rental income of persons includes the capital consumption adjustment.

8/ Includes actual employer contributions and actuarially imputed employer contributions to reflect benefits accrued by defined benefit pension plan participants through service to employers in the current period.

9/ Proprietors' income includes the inventory valuation adjustment and the capital consumption adjustment.

Note-- All dollar estimates are in current dollars (not adjusted for inflation).

Last updated: November 20, 2014-- new estimates for 2013; revised estimates for 2001-2012.

Legend / Footnotes:

- 1/ Nonfarm personal income is total personal income less farm income.
 - 2/ Farm income is farm earnings less farm employer contributions for social insurance.
 - 3/ Census Bureau midyear population estimates. Estimates for 2010-2013 reflect county population estimates available as of March 2014.
 - 4/ Per capita personal income is total personal income divided by total midyear population.
 - 5/ Employer contributions for government social insurance are included in earnings by industry and earnings by place of work, but they are excluded from net earnings by place of residence and personal income. Employee and self-employed contributions are subtractions in the calculation of net earnings by place of residence and all of the income measures.
 - 6/ The adjustment for residence is the net inflow of the earnings of interarea commuters. For the United States, it consists of adjustments for border workers and US residents employed by international organizations and foreign embassies.
 - 7/ Rental income of persons includes the capital consumption adjustment.
 - 8/ Includes actual employer contributions and actuarially imputed employer contributions to reflect benefits accrued by defined benefit pension plan participants through service to employers in the current period.
 - 9/ Proprietors' income includes the inventory valuation adjustment and the capital consumption adjustment.
- Note-- All dollar estimates are in current dollars (not adjusted for inflation).

CA04 Footnotes

<http://www.bea.gov/regional/reis/default.cfm?selTable=CA04>

Legend / Footnotes:

- 1/ Nonfarm personal income is total personal income less farm income.
- 2/ Farm income is farm earnings less farm employer contributions for social insurance.
- 3/ Census Bureau midyear population estimates. Estimates for 2010-2013 reflect county population estimates available as of March 2014.
- 4/ Per capita personal income is total personal income divided by total midyear population.
- 5/ Employer contributions for government social insurance are included in earnings by industry and earnings by place of work, but they are excluded from net earnings by place of residence and personal income. Employee and self-employed contributions are subtractions in the calculation of net earnings by place of residence and all of the income measures.
- 6/ The adjustment for residence is the net inflow of the earnings of interarea commuters. For the United States, it consists of adjustments for border workers and US residents employed by international organizations and foreign embassies.
- 7/ Rental income of persons includes the capital consumption adjustment.
- 8/ Includes actual employer contributions and actuarially imputed employer contributions to reflect benefits accrued by defined benefit pension plan participants through service to employers in the current period.
- 9/ Proprietors' income includes the inventory valuation adjustment and the capital consumption adjustment.
- Note-- All dollar estimates are in current dollars (not adjusted for inflation).
- Last updated: November 20, 2014-- new estimates for 2013; revised estimates for 2001-2012.

Legend / Footnotes:

- 1/ Nonfarm personal income is total personal income less farm income.
- 2/ Farm income is farm earnings less farm employer contributions for social insurance.
- 3/ Census Bureau midyear population estimates. Estimates for 2010-2013 reflect county population estimates available as of March 2014.
- 4/ Per capita personal income is total personal income divided by total midyear population.
- 5/ Employer contributions for government social insurance are included in earnings by industry and earnings by place of work, but they are excluded from net earnings by place of residence and personal income. Employee and self-employed contributions are subtractions in the calculation of net earnings by place of residence and all of the income measures.
- 6/ The adjustment for residence is the net inflow of the earnings of interarea commuters. For the United States, it consists of adjustments for border workers and US residents employed by international organizations and foreign embassies.
- 7/ Rental income of persons includes the capital consumption adjustment.
- 8/ Includes actual employer contributions and actuarially imputed employer contributions to reflect benefits accrued by defined benefit pension plan participants through service to employers in the current period.
- 9/ Proprietors' income includes the inventory valuation adjustment and the capital consumption adjustment.
- Note-- All dollar estimates are in current dollars (not adjusted for inflation).
- Last updated: November 20, 2014-- new estimates for 2013; revised estimates for 2001-2012.

COUNTY NONFARM PERSONAL INCOME GROWTH QUOTIENT
I.C. 6-1.1-17-3.5
DATE PREPARED: JULY 10, 2015
COUNTY: DUBOIS COUNTY

CA04 Footnotes

<http://www.bea.gov/regional/reis/default.cfm?selTable=CA04>

Legend / Footnotes:

- 1/ Nonfarm personal income is total personal income less farm income.
- 2/ Farm income is farm earnings less farm employer contributions for social insurance.
- 3/ Census Bureau midyear population estimates. Estimates for 2010-2013 reflect county population estimates available as of March 2014.
- 4/ Per capita personal income is total personal income divided by total midyear population.
- 5/ Employer contributions for government social insurance are included in earnings by industry and earnings by place of work, but they are excluded from net earnings by place of residence and personal income. Employee and self-employed contributions are subtractions in the calculation of net earnings by place of residence and all of the income measures.
- 6/ The adjustment for residence is the net inflow of the earnings of interarea commuters. For the United States, it consists of adjustments for border workers and US residents employed by international organizations and foreign embassies.
- 7/ Rental income of persons includes the capital consumption adjustment.
- 8/ Includes actual employer contributions and actuarially imputed employer contributions to reflect benefits accrued by defined benefit pension plan participants through service to employers in the current period.
- 9/ Proprietors' income includes the inventory valuation adjustment and the capital consumption adjustment.
- Note-- All dollar estimates are in current dollars (not adjusted for inflation).
- Last updated: November 20, 2014-- new estimates for 2013; revised estimates for 2001-2012.

CA04 Footnotes

<http://www.bea.gov/regional/reis/default.cfm?selTable=CA04>

Legend / Footnotes:

1/ Nonfarm personal income is total personal income less farm income.

2/ Farm income is farm earnings less farm employer contributions for social insurance.

3/ Census Bureau midyear population estimates. Estimates for 2010-2013 reflect county population estimates available as of March 2014.

4/ Per capita personal income is total personal income divided by total midyear population.

5/ Employer contributions for government social insurance are included in earnings by industry and earnings by place of work, but they are excluded from net earnings by place of residence and personal income. Employee and self-employed contributions are subtractions in the calculation of net earnings by place of residence and all of the income measures.

6/ The adjustment for residence is the net inflow of the earnings of interarea commuters. For the United States, it consists of adjustments for border workers and US residents employed by international organizations and foreign embassies.

7/ Rental income of persons includes the capital consumption adjustment.

8/ Includes actual employer contributions and actuarially imputed employer contributions to reflect benefits accrued by defined benefit pension plan participants through service to employers in the current period.

9/ Proprietors' income includes the inventory valuation adjustment and the capital consumption adjustment.

Note-- All dollar estimates are in current dollars (not adjusted for inflation).

Last updated: November 20, 2014-- new estimates for 2013; revised estimates for 2001-2012.

COUNTY NONFARM PERSONAL INCOME GROWTH QUOTIENT
I.C. 6-1.1-17-3.5
DATE PREPARED: JULY 10, 2015

Legend / Footnotes:

- 1/ Nonfarm personal income is total personal income less farm income.
- 2/ Farm income is farm earnings less farm employer contributions for social insurance.
- 3/ Census Bureau midyear population estimates. Estimates for 2010-2013 reflect county population estimates available as of March 2014.
- 4/ Per capita personal income is total personal income divided by total midyear population.
- 5/ Employer contributions for government social insurance are included in earnings by industry and earnings by place of work, but they are excluded from net earnings by place of residence and personal income. Employee and self-employed contributions are subtractions in the calculation of net earnings by place of residence and all of the income measures.
- 6/ The adjustment for residence is the net inflow of the earnings of interarea commuters. For the United States, it consists of adjustments for border workers and US residents employed by international organizations and foreign embassies.
- 7/ Rental income of persons includes the capital consumption adjustment.
- 8/ Includes actual employer contributions and actuarially imputed employer contributions to reflect benefits accrued by defined benefit pension plan participants through service to employers in the current period.
- 9/ Proprietors' income includes the inventory valuation adjustment and the capital consumption adjustment.
- Note-- All dollar estimates are in current dollars (not adjusted for inflation).
- Last updated: November 20, 2014-- new estimates for 2013; revised estimates for 2001-2012.

Legend / Footnotes:

- 1/ Nonfarm personal income is total personal income less farm income.
- 2/ Farm income is farm earnings less farm employer contributions for social insurance.
- 3/ Census Bureau midyear population estimates. Estimates for 2010-2013 reflect county population estimates available as of March 2014.
- 4/ Per capita personal income is total personal income divided by total midyear population.
- 5/ Employer contributions for government social insurance are included in earnings by industry and earnings by place of work, but they are excluded from net earnings by place of residence and personal income. Employee and self-employed contributions are subtractions in the calculation of net earnings by place of residence and all of the income measures.
- 6/ The adjustment for residence is the net inflow of the earnings of interarea commuters. For the United States, it consists of adjustments for border workers and US residents employed by international organizations and foreign embassies.
- 7/ Rental income of persons includes the capital consumption adjustment.
- 8/ Includes actual employer contributions and actuarially imputed employer contributions to reflect benefits accrued by defined benefit pension plan participants through service to employers in the current period.
- 9/ Proprietors' income includes the inventory valuation adjustment and the capital consumption adjustment.
- Note-- All dollar estimates are in current dollars (not adjusted for inflation).
- Last updated: November 20, 2014-- new estimates for 2013; revised estimates for 2001-2012.

Legend / Footnotes:

- 1/ Nonfarm personal income is total personal income less farm income.
- 2/ Farm income is farm earnings less farm employer contributions for social insurance.
- 3/ Census Bureau midyear population estimates. Estimates for 2010-2013 reflect county population estimates available as of March 2014.
- 4/ Per capita personal income is total personal income divided by total midyear population.
- 5/ Employer contributions for government social insurance are included in earnings by industry and earnings by place of work, but they are excluded from net earnings by place of residence and personal income. Employee and self-employed contributions are subtractions in the calculation of net earnings by place of residence and all of the income measures.
- 6/ The adjustment for residence is the net inflow of the earnings of interarea commuters. For the United States, it consists of adjustments for border workers and US residents employed by international organizations and foreign embassies.
- 7/ Rental income of persons includes the capital consumption adjustment.
- 8/ Includes actual employer contributions and actuarially imputed employer contributions to reflect benefits accrued by defined benefit pension plan participants through service to employers in the current period.
- 9/ Proprietors' income includes the inventory valuation adjustment and the capital consumption adjustment.
- Note-- All dollar estimates are in current dollars (not adjusted for inflation).
- Last updated: November 20, 2014-- new estimates for 2013; revised estimates for 2001-2012.

CA04 Footnotes

<http://www.bea.gov/regional/reis/default.cfm?selTable=CA04>

Legend / Footnotes:

- 1/ Nonfarm personal income is total personal income less farm income.
- 2/ Farm income is farm earnings less farm employer contributions for social insurance.
- 3/ Census Bureau midyear population estimates. Estimates for 2010-2013 reflect county population estimates available as of March 2014.
- 4/ Per capita personal income is total personal income divided by total midyear population.
- 5/ Employer contributions for government social insurance are included in earnings by industry and earnings by place of work, but they are excluded from net earnings by place of residence and personal income. Employee and self-employed contributions are subtractions in the calculation of net earnings by place of residence and all of the income measures.
- 6/ The adjustment for residence is the net inflow of the earnings of interarea commuters. For the United States, it consists of adjustments for border workers and US residents employed by international organizations and foreign embassies.
- 7/ Rental income of persons includes the capital consumption adjustment.
- 8/ Includes actual employer contributions and actuarially imputed employer contributions to reflect benefits accrued by defined benefit pension plan participants through service to employers in the current period.
- 9/ Proprietors' income includes the inventory valuation adjustment and the capital consumption adjustment.
- Note-- All dollar estimates are in current dollars (not adjusted for inflation).
- Last updated: November 20, 2014-- new estimates for 2013; revised estimates for 2001-2012.

CA04 Footnotes

<http://www.bea.gov/regional/reis/default.cfm?selTable=CA04>

Legend / Footnotes:

- 1/ Nonfarm personal income is total personal income less farm income.
 - 2/ Farm income is farm earnings less farm employer contributions for social insurance.
 - 3/ Census Bureau midyear population estimates. Estimates for 2010-2013 reflect county population estimates available as of March 2014.
 - 4/ Per capita personal income is total personal income divided by total midyear population.
 - 5/ Employer contributions for government social insurance are included in earnings by industry and earnings by place of work, but they are excluded from net earnings by place of residence and personal income. Employee and self-employed contributions are subtractions in the calculation of net earnings by place of residence and all of the income measures.
 - 6/ The adjustment for residence is the net inflow of the earnings of interarea commuters. For the United States, it consists of adjustments for border workers and US residents employed by international organizations and foreign embassies.
 - 7/ Rental income of persons includes the capital consumption adjustment.
 - 8/ Includes actual employer contributions and actuarially imputed employer contributions to reflect benefits accrued by defined benefit pension plan participants through service to employers in the current period.
 - 9/ Proprietors' income includes the inventory valuation adjustment and the capital consumption adjustment.
- Note-- All dollar estimates are in current dollars (not adjusted for inflation).
- Last updated: November 20, 2014-- new estimates for 2013; revised estimates for 2001-2012.

COUNTY NONFARM PERSONAL INCOME GROWTH QUOTIENT
I.C. 6-1.1-17-3.5
DATE PREPARED: JULY 10, 2015
COUNTY: LAKE COUNTY

Step 1a: Determine calendar year county nonfarm personal income for each of the six preceeding years			Annual Lake Nonfarm	Percent From	Change To		
	Year		Personal Income			Calculation	
Step 1b: Calculate the annual percent change for each of the six preceding years	0	2007	16,403,901.0	2006	2007		
	1	2008	16,978,675.0	2007	2008	0.035	
	2	2009	16,512,519.0	2008	2009	-0.027

<http://www.bea.gov/regional/reis/default.cfm?selTable=CA04>

Legend / Footnotes:

- 1/ Nonfarm personal income is total personal income less farm income.
- 2/ Farm income is farm earnings less farm employer contributions for social insurance.
- 3/ Census Bureau midyear population estimates. Estimates for 2010-2013 reflect county population estimates available as of March 2014.
- 4/ Per capita personal income is total personal income divided by total midyear population.
- 5/ Employer contributions for government social insurance are included in earnings by industry and earnings by place of work, but they are excluded from net earnings by place of residence and personal income. Employee and self-employed contributions are subtractions in the calculation of net earnings by place of residence and all of the income measures.
- 6/ The adjustment for residence is the net inflow of the earnings of interarea commuters. For the United States, it consists of adjustments for border workers and US residents employed by international organizations and foreign embassies.
- 7/ Rental income of persons includes the capital consumption adjustment.
- 8/ Includes actual employer contributions and actuarially imputed employer contributions to reflect benefits accrued by defined benefit pension plan participants through service to employers in the current period.
- 9/ Proprietors' income includes the inventory valuation adjustment and the capital consumption adjustment.
- Note-- All dollar estimates are in current dollars (not adjusted for inflation).
- Last updated: November 20, 2014-- new estimates for 2013; revised estimates for 2001-2012.

COUNTY NONFARM PERSONAL INCOME GROWTH QUOTIENT
I.C. 6-1.1-17-3.5
DATE PREPARED: JULY 10, 2015
COUNTY: MADISON COUNTY

Step 1a: Determine calendar year county nonfarm personal income for each of the six preceeding years			Annual Madison Nonfarm	Percent	Change		
	Year		Personal Income	From	To	Calculation	
	0	2007	3,905,235.0	2006	2007		
Step 1b: Calculate the annual percent change for each of the six preceding years	1	2008	3,836,912.0	2007	2008	-0.017	
	2	2009	3,772,387.0	2008	2009	-0.017

 - 5/ Employer contributions for government social insurance are included in earnings by industry and earnings by place of work, but they are excluded from net earnings by place of residence and personal income. Employee and self-employed contributions are subtractions in the calculation of net earnings by place of residence and all of the income measures.
 - 6/ The adjustment for residence is the net inflow of the earnings of interarea commuters. For the United States, it consists of adjustments for border workers and US residents employed by international organizations and foreign embassies.
 - 7/ Rental income of persons includes the capital consumption adjustment.
 - 8/ Includes actual employer contributions and actuarially imputed employer contributions to reflect benefits accrued by defined benefit pension plan participants through service to employers in the current period.
 - 9/ Proprietors' income includes the inventory valuation adjustment and the capital consumption adjustment.
- Note-- All dollar estimates are in current dollars (not adjusted for inflation).
Last updated: November 20, 2014-- new estimates for 2013; revised estimates for 2001-2012.

COUNTY NONFARM PERSONAL INCOME GROWTH QUOTIENT
I.C. 6-1.1-17-3.5
DATE PREPARED: JULY 10, 2015
COUNTY: MARTIN COUNTY

Step 1a: Determine calendar year county nonfarm
personal income for each of the six preceeding years

Step 1b: Calculate the annual percent change for
each of the six preceding years

Step 2: Sum the results of Step 1b
Step 3: Divide the results of Step 2 by six

SIX YEAR AVERAGE GROWTH

Year		Annual Martin Nonfarm Personal Income	Percent From 2006	Change To 2007	Calculation

CA04 Footnotes

<http://www.bea.gov/regional/reis/default.cfm?selTable=CA04>

Legend / Footnotes:

1/ Nonfarm personal income is total personal income less farm income.

2/ Farm income is farm earnings less farm employer contributions for social insurance.

3/ Census Bureau midyear population estimates. Estimates for 2010-2013 reflect county population estimates available as of March 2014.

4/ Per capita personal income is total personal income divided by total midyear population.

5/ Employer contributions for government social insurance are included in earnings by industry and earnings by place of work, but they are excluded from net earnings by place of residence and personal income. Employee and self-employed contributions are subtractions in the calculation of net earnings by place of residence and all of the income measures.

6/ The adjustment for residence is the net inflow of the earnings of interarea commuters. For the United States, it consists of adjustments for border workers and US residents employed by international organizations and foreign embassies.

7/ Rental income of persons includes the capital consumption adjustment.

8/ Includes actual employer contributions and actuarially imputed employer contributions to reflect benefits accrued by defined benefit pension plan participants through service to employers in the current period.

9/ Proprietors' income includes the inventory valuation adjustment and the capital consumption adjustment.

Note-- All dollar estimates are in current dollars (not adjusted for inflation).

Legend / Footnotes:

- 1/ Nonfarm personal income is total personal income less farm income.
- 2/ Farm income is farm earnings less farm employer contributions for social insurance.
- 3/ Census Bureau midyear population estimates. Estimates for 2010-2013 reflect county population estimates available as of March 2014.
- 4/ Per capita personal income is total personal income divided by total midyear population.
- 5/ Employer contributions for government social insurance are included in earnings by industry and earnings by place of work, but they are excluded from net earnings by place of residence and personal income. Employee and self-employed contributions are subtractions in the calculation of net earnings by place of residence and all of the income measures.
- 6/ The adjustment for residence is the net inflow of the earnings of interarea commuters. For the United States, it consists of adjustments for border workers and US residents employed by international organizations and foreign embassies.
- 7/ Rental income of persons includes the capital consumption adjustment.
- 8/ Includes actual employer contributions and actuarially imputed employer contributions to reflect benefits accrued by defined benefit pension plan participants through service to employers in the current period.
- 9/ Proprietors' income includes the inventory valuation adjustment and the capital consumption adjustment.
- Note-- All dollar estimates are in current dollars (not adjusted for inflation).
- Last updated: November 20, 2014-- new estimates for 2013; revised estimates for 2001-2012.

COUNTY NONFARM PERSONAL INCOME GROWTH QUOTIENT

Legend / Footnotes:

1/ Nonfarm personal income is total personal income less farm income.

2/ Farm income is farm earnings less farm employer contributions for social insurance.

3/ Census Bureau midyear population estimates. Estimates for 2010-2013 reflect county population estimates available as of March 2014.

4/ Per capita personal income is total personal income divided by total midyear population.

5/ Employer contributions for government social insurance are included in earnings by industry and earnings by place of work, but they are excluded from net earnings by place of residence and personal income. Employee and self-employed contributions are subtractions in the calculation of net earnings by place of residence and all of the income measures.

6/ The adjustment for residence is the net inflow of the earnings of interarea commuters. For the United States, it consists of adjustments for border workers and US residents employed by international organizations and foreign embassies.

7/ Rental income of persons includes the capital consumption adjustment.

8/ Includes actual employer contributions and actuarially imputed employer contributions to reflect benefits accrued by defined benefit pension plan participants through service to employers in the current period.

9/ Proprietors' income includes the inventory valuation adjustment and the capital consumption adjustment.

Note-- All dollar estimates are in current dollars (not adjusted for inflation).

Legend / Footnotes:

- 1/ Nonfarm personal income is total personal income less farm income.
- 2/ Farm income is farm earnings less farm employer contributions for social insurance.
- 3/ Census Bureau midyear population estimates. Estimates for 2010-2013 reflect county population estimates available as of March 2014.
- 4/ Per capita personal income is total personal income divided by total midyear population.
- 5/ Employer contributions for government social insurance are included in earnings by industry and earnings by place of work, but they are excluded from net earnings by place of residence and personal income. Employee and self-employed contributions are subtractions in the calculation of net earnings by place of residence and all of the income measures.
- 6/ The adjustment for residence is the net inflow of the earnings of interarea commuters. For the United States, it consists of adjustments for border workers and US residents employed by international organizations and foreign embassies.
- 7/ Rental income of persons includes the capital consumption adjustment.
- 8/ Includes actual employer contributions and actuarially imputed employer contributions to reflect benefits accrued by defined benefit pension plan participants through service to employers in the current period.
- 9/ Proprietors' income includes the inventory valuation adjustment and the capital consumption adjustment.
- Note-- All dollar estimates are in current dollars (not adjusted for inflation).
- Last updated: November 20, 2014-- new estimates for 2013; revised estimates for 2001-2012.

CA04 Footnotes

<http://www.bea.gov/regional/reis/default.cfm?selTable=CA04>

Legend / Footnotes:

1/ Nonfarm personal income is total personal income less farm income.

2/ Farm income is farm earnings less farm employer contributions for social insurance.

3/ Census Bureau midyear population estimates. Estimates for 2010-2013 reflect county population estimates available as of March 2014.

4/ Per capita personal income is total personal income divided by total midyear population.

5/ Employer contributions for government social insurance are included in earnings by industry and earnings by place of work, but they are excluded from net earnings by place of residence and personal income. Employee and self-employed contributions are subtractions in the calculation of net earnings by place of residence and all of the income measures.

6/ The adjustment for residence is the net inflow of the earnings of interarea commuters. For the United States, it consists of adjustments for border workers and US residents employed by international organizations and foreign embassies.

7/ Rental income of persons includes the capital consumption adjustment.

8/ Includes actual employer contributions and actuarially imputed employer contributions to reflect benefits accrued by defined benefit pension plan participants through service to employers in the current period.

9/ Proprietors' income includes the inventory valuation adjustment and the capital consumption adjustment.

Note-- All dollar estimates are in current dollars (not adjusted for inflation).

Last updated: November 20, 2014-- new estimates for 2013; revised estimates for 2001-2012.

CA04 Footnotes

<http://www.bea.gov/regional/reis/default.cfm?selTable=CA04>

Legend / Footnotes:

1/ Nonfarm personal income is total personal income less farm income.

2/ Farm income is farm earnings less farm employer contributions for social insurance.

3/ Census Bureau midyear population estimates. Estimates for 2010-2013 reflect county population estimates available as of March 2014.

4/ Per capita personal income is total personal income divided by total midyear population.

5/ Employer contributions for government social insurance are included in earnings by industry and earnings by place of work, but they are excluded from net earnings by place of residence and personal income. Employee and self-employed contributions are subtractions in the calculation of net earnings by place of residence and all of the income measures.

6/ The adjustment for residence is the net inflow of the earnings of interarea commuters. For the United States, it consists of adjustments for border workers and US residents employed by international organizations and foreign embassies.

7/ Rental income of persons includes the capital consumption adjustment.

8/ Includes actual employer contributions and actuarially imputed employer contributions to reflect benefits accrued by defined benefit pension plan participants through service to employers in the current period.

9/ Proprietors' income includes the inventory valuation adjustment and the capital consumption adjustment.

Note-- All dollar estimates are in current dollars (not adjusted for inflation).

Last updated: November 20, 2014-- new estimates for 2013; revised estimates for 2001-2012.

COUNTY NONFARM PERSONAL INCOME GROWTH QUOTIENT
I.C. 6-1.1-17-3.5
DATE PREPARED: JULY 10, 2015
COUNTY: SCOTT COUNTY

Step 1a: Determine calendar year county nonfarm
personal income for each of the six preceeding years

Step 1b: Calculate the annual percent change for
each of the six preceding years

Step 2: Sum the results of Step 1b
Step 3: Divide the results of Step 2 by six

SIX YEAR AVERAGE GROWTH

CA04 Footnotes

<http://www.bea.gov/regional/reis/default.cfm?selTable=CA04>

Legend / Footnotes:

1/ Nonfarm personal income is total personal income less farm income.

2/ Farm income is farm earnings less farm employer contributions for social insurance.

3/ Census Bureau midyear population estimates. Estimates for 2010-2013 reflect county population estimates available as of March 2014.

4/ Per capita personal income is total personal income divided by total midyear population.

5/ Employer contributions for government social insurance are included in earnings by industry and earnings by place of work, but they are excluded from net earnings by place of residence and personal income. Employee and self-employed contributions are subtractions in the calculation of net earnings by place of residence and all of the income measures.

6/ The adjustment for residence is the net inflow of the earnings of interarea commuters. For the United States, it consists of adjustments for border workers and US residents employed by international organizations and foreign embassies.

7/ Rental income of persons includes the capital consumption adjustment.

8/ Includes actual employer contributions and actuarially imputed employer contributions to reflect benefits accrued by defined benefit pension plan participants through service to employers in the current period.

9/ Proprietors' income includes the inventory valuation adjustment and the capital consumption adjustment.

Note-- All dollar estimates are in current dollars (not adjusted for inflation).

Last updated: November 20, 2014-- new estimates for 2013; revised estimates for 2001-2012.

Legend / Footnotes:

- 1/ Nonfarm personal income is total personal income less farm income.
- 2/ Farm income is farm earnings less farm employer contributions for social insurance.
- 3/ Census Bureau midyear population estimates. Estimates for 2010-2013 reflect county population estimates available as of March 2014.
- 4/ Per capita personal income is total personal income divided by total midyear population.
- 5/ Employer contributions for government social insurance are included in earnings by industry and earnings by place of work, but they are excluded from net earnings by place of residence and personal income. Employee and self-employed contributions are subtractions in the calculation of net earnings by place of residence and all of the income measures.
- 6/ The adjustment for residence is the net inflow of the earnings of interarea commuters. For the United States, it consists of adjustments for border workers and US residents employed by international organizations and foreign embassies.
- 7/ Rental income of persons includes the capital consumption adjustment.
- 8/ Includes actual employer contributions and actuarially imputed employer contributions to reflect benefits accrued by defined benefit pension plan participants through service to employers in the current period.
- 9/ Proprietors' income includes the inventory valuation adjustment and the capital consumption adjustment.
- Note-- All dollar estimates are in current dollars (not adjusted for inflation).
- Last updated: November 20, 2014-- new estimates for 2013; revised estimates for 2001-2012.

COUNTY NONFARM PERSONAL INCOME GROWTH QUOTIENT

5/ Employer contributions for government social insurance are included in earnings by industry and earnings by place of work, but they are excluded from net earnings by place of residence and personal income. Employee and self-employed contributions are subtractions in the calculation of net earnings by place of residence and all of the income measures.

6/ The adjustment for residence is the net inflow of the earnings of interarea commuters. For the United States, it consists of adjustments for border workers and US residents employed by international organizations and foreign embassies.

7/ Rental income of persons includes the capital consumption adjustment.

8/ Includes actual employer contributions and actuarially imputed employer contributions to reflect benefits accrued by defined benefit pension plan participants through service to employers in the current period.

9/ Proprietors' income includes the inventory valuation adjustment and the capital consumption adjustment.

Note-- All dollar estimates are in current dollars (not adjusted for inflation).

Last updated: November 20, 2014-- new estimates for 2013; revised estimates for 2001-2012.

COUNTY NONFARM PERSONAL INCOME GROWTH QUOTIENT
I.C. 6-1.1-17-3.5
DATE PREPARED: JULY 10, 2015

Legend / Footnotes:

- 1/ Nonfarm personal income is total personal income less farm income.
- 2/ Farm income is farm earnings less farm employer contributions for social insurance.
- 3/ Census Bureau midyear population estimates. Estimates for 2010-2013 reflect county population estimates available as of March 2014.
- 4/ Per capita personal income is total personal income divided by total midyear population.
- 5/ Employer contributions for government social insurance are included in earnings by industry and earnings by place of work, but they are excluded from net earnings by place of residence and personal income. Employee and self-employed contributions are subtractions in the calculation of net earnings by place of residence and all of the income measures.
- 6/ The adjustment for residence is the net inflow of the earnings of interarea commuters. For the United States, it consists of adjustments for border workers and US residents employed by international organizations and foreign embassies.
- 7/ Rental income of persons includes the capital consumption adjustment.
- 8/ Includes actual employer contributions and actuarially imputed employer contributions to reflect benefits accrued by defined benefit pension plan participants through service to employers in the current period.
- 9/ Proprietors' income includes the inventory valuation adjustment and the capital consumption adjustment.
- Note-- All dollar estimates are in current dollars (not adjusted for inflation).
- Last updated: November 20, 2014-- new estimates for 2013; revised estimates for 2001-2012.

CA04 Footnotes

<http://www.bea.gov/regional/reis/default.cfm?selTable=CA04>

Legend / Footnotes:

1/ Nonfarm personal income is total personal income less farm income.

2/ Farm income is farm earnings less farm employer contributions for social insurance.

3/ Census Bureau midyear population estimates. Estimates for 2010-2013 reflect county population estimates available as of March 2014.

4/ Per capita personal income is total personal income divided by total midyear population.

5/ Employer contributions for government social insurance are included in earnings by industry and earnings by place of work, but they are excluded from net earnings by place of residence and personal income. Employee and self-employed contributions are subtractions in the calculation of net earnings by place of residence and all of the income measures.

6/ The adjustment for residence is the net inflow of the earnings of interarea commuters. For the United States, it consists of adjustments for border workers and US residents employed by international organizations and foreign embassies.

7/ Rental income of persons includes the capital consumption adjustment.

8/ Includes actual employer contributions and actuarially imputed employer contributions to reflect benefits accrued by defined benefit pension plan participants through service to employers in the current period.

9/ Proprietors' income includes the inventory valuation adjustment and the capital consumption adjustment.

Note-- All dollar estimates are in current dollars (not adjusted for inflation).

Last updated: November 20, 2014-- new estimates for 2013; revised estimates for 2001-2012.

COUNTY NONFARM PERSONAL INCOME GROWTH QUOTIENT
I.C. 6-1.1-17-3.5
DATE PREPARED: JULY 10, 2015

CA04 Footnotes

<http://www.bea.gov/regional/reis/default.cfm?selTable=CA04>

Legend / Footnotes:

- 1/ Nonfarm personal income is total personal income less farm income.
- 2/ Farm income is farm earnings less farm employer contributions for social insurance.
- 3/ Census Bureau midyear population estimates. Estimates for 2010-2013 reflect county population estimates available as of March 2014.
- 4/ Per capita personal income is total personal income divided by total midyear population.
- 5/ Employer contributions for government social insurance are included in earnings by industry and earnings by place of work, but they are excluded from net earnings by place of residence and personal income. Employee and self-employed contributions are subtractions in the calculation of net earnings by place of residence and all of the income measures.
- 6/ The adjustment for residence is the net inflow of the earnings of interarea commuters. For the United States, it consists of adjustments for border workers and US residents employed by international organizations and foreign embassies.
- 7/ Rental income of persons includes the capital consumption adjustment.
- 8/ Includes actual employer contributions and actuarially imputed employer contributions to reflect benefits accrued by defined benefit pension plan participants through service to employers in the current period.
- 9/ Proprietors' income includes the inventory valuation adjustment and the capital consumption adjustment.
- Note-- All dollar estimates are in current dollars (not adjusted for inflation).
- Last updated: November 20, 2014-- new estimates for 2013; revised estimates for 2001-2012.
